(D-506, Vishwajeet Residency, Tulaja Bhavani Nagar, Kharadi, Pune - 411014)

Experience

Deutsche Bank

July 2018-present

Software Developer

Part of the big data team. Currently working on Streamsets to develop data pipelines.
Recently started working on Hadoop, Spark and Scala.
Used JAVA Spring Boot application in the induction programme to create APIs for HR portal.

Bushel Technologies

May 2017-June 2017

Intern

Developed a prototype for storing deputy credit scripts. Implemented the solution by storing graphs in the database so that relationships between different items can be extracted efficiently.
Developed microservices using ASP.NET Core and C#.

Projects

Human Activity Recognition

August 2017-May 2018

Recognition of human activities in the video clip to differentiate between normal and abnormal activities. Technologies Used : OpenCV, Image Processing

Django Web Application for Image Recognition

Feb 2017

Image recognition for visually challenged people. The output was given in voice format.
Technologies Used : Django, IBM WATSON APIs.

Telephone Directory System

March 2016

Created a telephone directory system to provide different functionalities such as login, providing different search methods for finding name or number of a person.
Technologies Used : Java Servlets and HTML.

Education

Visvesvaraya National Institute of Technology

2014 - 2018

B.Tech in Computer Science and Engineering

CGPA - 7.03

Technical Skills

Programming Languages

C, C++, Java, C#, Python

Others

Spring Boot, ASP.NET Core,
REST APIs, Hadoop,
Spark, Streamsets
